ZEITSCHRIFT FÜR PHYSIK B

Condensed Matter

Unter Mitwirkung der Deutschen Physikalischen Gesellschaft
Recognized by the European Physical Society EPS

Editor-in-Chief:
S. Grossmann, Marburg
H. Rietschel, Karlsruhe

Editor for Rapid Notes:
P. Fulde, Stuttgart

Editorial Board:
E. Courtens, Montpellier
J. Fink, Dresden
F. Haake, Essen
H. Horner, Heidelberg
S.W. Koch, Marburg
U. Merkt, Hamburg
F. Mezei, Berlin
E. Müller-Hartmann, Köln
J. Pollmann, Münster
M. Steiner, Berlin
P.R. Wyder, Grenoble

Volume 103 · 1997

Springer

Founded in 1920. Edited with the collaboration of the Deutsche Physikalische Gesellschaft by *K. Scheel* and *H. Geiger*; Vols 124–141 (1947–1955) by *M. v. Laue* and *R.W. Pohl*; Vols 142–203 (1955–1967) by *O. Haxel* and *H. Jensen*; Vols 204–258 (1967–1973) by *E. Fünfer, O. Haxel, H. Jensen*, and *G. Leibfried*, from Vol. 259 by *E. Fünfer, O. Haxel, G. Leibfried*, and *H.A. Weidenmüller*. Vols 129–175 were produced with the collaboration of the Verband Deutscher Physikalischer Gesellschaften; from Vol. 176, the Deutsche Physikalische Gesellschaft. Published: Vols 1–4 (1921) Braunschweig, Fr. Vieweg & Sohn; Vol. 5 onwards, Berlin, Springer.

Starting with Vol. 272 (1975) Zeitschrift für Physik has been divided into two separate journals: *Zeitschrift für Physik A (Atoms and Nuclei)* and *Zeitschrift für Physik B (Condensed Matter and Quanta)*. The title *Zeitschrift für Physik B (Condensed Matter and Quanta)* has been changed to *Zeitschrift für Physik B (Condensed Matter)* from Vol. 38 (1980). In 1979 a third section was added: *Zeitschrift für Physik C (Particles and Fields)*. In 1986 *Zeitschrift für Physik D (Atoms, Molecules and Clusters)* was added and the title of *Zeitschrift für Physik A (Atoms and Nuclei)* changed to *Zeitschrift für Physik A (Atomic Nuclei)*; this title was retained until 1991, when, with Vol. 338, it was changed to *Zeitschrift für Physik A (Hadrons and Nuclei)*.

Copyright Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis), that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission form the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special Regulations for Photocopies in the USA Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0722-3277, the volume, and first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag Journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel.: 613-993-9251, Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Instructions for Authors

Copyright

The copyright to the article is transferred to Springer-Verlag (for U.S. government employees: to the extent transferable) effective if and when the article is accepted for publication. The copyright transfer covers the exclusive right to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or any other reproductions of similar nature.
Authors are kindly asked to fill out and attach the Copyright Transfer Statement printed below to the final manuscript. This form can also be obtained from the web (http://link.springer.de/ol/pol/) or by sending an e-mail to pol @springer.de.

Manuscript submission

It is recommended to submit the manuscript in electronic form. However, submission as hard copy is still possible.

Electronic submission of manuscripts

A manuscript should preferably be coded in LaTeX and be submitted in **electronic form** via e-mail to the editorial office

ZPhys@springer.de

as *.tex file (tar, compress, uuencode). Figures should be included as separate files as PostScript (PS) or Encapsulated PostScript (EPS). A member of the editorial board or the Editor-in-Chief to whom the manuscript should be forwarded may be indicated in the submission letter (see editorial board).
If the paper is made available on a preprint server simultaneously, please also supply the name of the server and the document number and make sure that all publication and copyright information is inseparably linked to the preprint.

LaTeX manuscripts

Authors who submit their manuscript in LaTeX are encouraged to make use of our LaTeX 2.09 macro package LJour2 (version 3.0). Manuscripts coded in general LaTeX are also welcome though this may cause a delay in publication.
For Plain-TeX users the macro package PJour2g (version 3.0) is available.

Each of the macro packages is available by sending an e-mail to our mail server
svserv@vax.ntp.springer.de
containing the line:
send /tex/latex/ljour2.zip or
send /tex/plain/pjour2g.zip or
via anonymous ftp or gopher from our ftp/gopher server
ftp.springer.de (IP number: 192.129.24.12)
in the directory /pub/tex/latex/ljour2 or
/pub/tex/plain/pjour2g or from
http://www.springer.de/author/tex/help-tex.html
(search for LJour2 or PJour2g) or on diskette (only on request).

Please adhere to the definitions in the macro packages and do not alter any of the definitions in them since this will cause a delay in publication.
After the manuscript is accepted, the Editors-in-Chief will inform the author to which address the final file together with one print-out for reference can be sent. Please send the files in accordance with the procedure outlined in the letter of acceptance sent to you by the Editors-in-Chief and make sure that hard and soft copy are identical.

Rapid notes

Important new results may be considered for publication as a Rapid note. Manuscripts should be in LaTeX (see above). They should be restricted in length to 2 journal pages and should be sent directly to the editor for Short notes. Such papers can generally be published within 4-8 weeks of acceptance.

(continued overleaf)

Copyright Transfer Statement

Journal: Zeitschrift für Physik B – Condensed Matter

The copyright to this article is transferred to Springer-Verlag (for U.S. government employees: to the extent transferable) effective if and when the article is accepted for publication. The copyright transfer covers the exclusive right to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or any other reproductions of similar nature.
The author warrants that this contribution is original and that he/she has full power to make this grant. The author signs for and accepts responsibility for releasing this material on behalf of any and all co-authors.

Title of article

Author(s)

Author's signature Date

Optional:

❑ Yes, my name and address should be added to Springer-Verlag's address pool.

To be completed by Springer-Verlag:

Published in Volume _____, issue _____, year _____

Hard-copy submission of manuscripts

Manuscripts in other formats should be submitted as hard copy in triplicate to a member of the editorial board or to one of the Editors-in-Chief (see editorial board). Rejected manuscripts will normally not be returned.

Please indicate in the margin approximately where the figures should be placed. Figures and tables should be on separate pages at the end of the paper and not inserted in the text.

After acceptance of the paper, those available in electronic form other than TeX or LaTeX may also be submitted to the Publisher on diskette together with the final hard-copy version of the paper. If possible, files of figures should be included on the disk(s) that is (are) submitted to the Editors. In case they require too much disk capacity, they may be sent directly to the Publisher by e-mail. In this case, it is better to send both the text file and the files of the figures together as one file (tar, compress and uuencode). Figure captions should be included in the text and not in the figure file, and figure parts (e.g., Fig. 1a, b) should have the part designation included at an appropriate place in the figure.

Manuscript contents

Manuscripts should in general contain in the following order:
Title, author's name, address of author's institution, abstract, 1 - 3 PACS numbers, main text, acknowledgements, list of references, list of figure and table captions, tables and figures.

Title

The title of the paper should be concise but informative.

Authors and addresses

Multiple-authored manuscripts or manuscripts submitted by a number of authors from many institutes for a collaborative study, a list of all authors and a list of all addresses should be furnished. There should be a number for each address and the authors names should be marked with the appropriate numerical superscript(s). Footnotes relating to the authors should employ lower-case letters.
To speed up communication between authors, readers and publisher, authors are requested to provide FAX , e-mail or telephone numbers. Unless the authors request otherwise these numbers will be published along with the affiliation to facilitate efficient information exchange between readers and authors.

Abstract

The abstract should be informative, indicate the general scope of the paper and contain the main results obtained and conclusions drawn. It should be complete in itself; mathematical expressions should not be included. The abstract must not exceed 200 words, and should be suitable for publication without change in abstracting journals.

PACS numbers

Further details can be inferred from the appropriate listings of PACS numbers [American Institute of Physics, AIP PUB.R-261.14 (1996)].

Main text

Manuscripts should be divided into numbered sections and subsections, starting with '1. Introduction'. Subsections should be numbered 2.1, 2.2, 3.1 etc.; appendices with A, B etc. All sections must have a short descriptive title.

Figures

Figures should be limited to the minimum number needed to clarify the text and must conform to the usual quality criteria. They should be consecutively numbered and have a brief descriptive caption. Each must be cited in the text.

Footnotes

Footnotes in the main text should be avoided if possible. Where absolutely necessary, they should be marked with a numerical superscript and placed at the foot of the relevant page (not at the end of the article).

References

References should be cited by numbers in square brackets, for example, [5], [5, 7, 10], [5-8]. They should be numbered and listed in the order in which they are cited. In preparing the reference list please adhere to the following format:

For journal articles:
1.Bednorz, J.G., Müller, K.A.: Z. Phys. B **64**, 189 (1986)
For books:
2. Ibach, H., Lüth, H.: Solid-State Physics. Berlin, Heidelberg, New York: Springer 1987

In the text authors may be cited by name, but without initials; if more than two, only the name of the first author should be given, followed by et al., e.g., Bednorz et al. [1].

Units and abbreviations

Please adhere to internationally agreed standards such as those adopted by the commission of the International Union of Pure and Applied Physics (IUPAP) or defined by the International Organization of Standardization (ISO). The journal will in general comply with the notation and abbreviations set out in the Style Manual of the American Institute of Physics. Metric SI units should be used throughout.

Equations, fonts and special symbols

Equations must be typewritten in papers submitted as hard copy and, in general, be sequentially numbered. The number should appear in parentheses at the right-hand side of the page and this form, e.g. (7), is sufficient to refer to the equation in the text. Special care should be taken to distinguish subscripts, superscripts and certain symbols. Symbols and letters representing physical and mathematical variables should be in italic. Units, abbreviations and special functions (Å, rf, dc, exp, tan, etc.) should be upright. Please add a note to explain any other special symbols.

Page proofs

For all papers, except Rapid notes, page proofs will be sent to the authors. Please note that corrections should be restricted to typographical errors; costs for extensive additional changes will be charged to the author. Where absolutely essential the addition of a "Note added in proof" will be considered.

Offprints

Offprints may be ordered at cost price when the page proofs are returned.

Important note

You may also submit your paper to the electronic-only journal ZPhys-e. Please ask for details via http://link.springer.de/ol/pol/ or by e-mail to pol@springer.de.

This journal is included in the Physics Online Library (POL), i.e., the table of contents and abstracts are available free of charge via the World Wide Web several weeks before the new issue reaches the subscribers. The full text in PDF and PS format is simultaneously available for subscribers to the printed version. Details can be obtained via http://link.springer.de/ol/pol/ or by sending an e-mail message to pol@springer.de. Papers that have been accepted for publication in the printed version will be incorporated uncorrected with title, author(s) and abstract in http://link.springer.de/ol/pol/ (search for Papers accepted) as an advance information for the community. After publication, they will disappear from this preprint service.

European Physics Review

Towards Europe In Scientific Publication

In response to the wishes of the physics community, the publishers of *Journal de Physique* (Éditions de Physique) and *Zeitschrift für Physik* (Springer-Verlag) have agreed to a merging of these two journals. Both journals have a centennial tradition: *Journal de Physique* is the review of the Société Française de Physique and *Zeitschrift für Physik* is published in cooperation with the Deutsche Physikalische Gesellschaft. The united journal, comprising *Journal de Physique* and *Zeitschrift für Physik* will continue the long tradition under the new name "European Physics Review" (*EPR*) which will represent the European future of science with an increased cooperation among European scientists.

EPR is a journal open to original contributions in all fields of Physics and to the world-wide community of physicists.

There will be four sections of *EPR* for basic science; two of them *EPR* B and *EPR* D include JP I, II and ZPhys B, D with a rearranged and enlarged catalogue of subfields. The other two originate from ZPhys A and C.

EPR B:

Condensed Matter, Soft Condensed Matter, Statistical Physics, Mesoscopic Physics, Physical Mechanics and Hydrodynamics, General and Interdisciplinary Physics.

EPR D:

Atoms, Molecules and Clusters (also at surfaces), Optical Physics, Quantum Optics, Classical and Quantum Chaos.

The merging of these two journals will concentrate and improve publishing while avoiding further proliferation of publishing activities which neither individuals' nor libraries' budgets can follow. Subscription rates will be **lower** than the sum of JP and ZPhys.

We are convinced that *EPR* will constitute the nucleus for a further merging of other national physics journals so as to strengthen European publishing. It will thus reflect the political and economical process towards the unity of Europe and at the same time broaden the community which reads and publishes in a well recognized European journal.

The merging of JP and ZPhys into *EPR* will become effective at the beginning of 1998 with the first issues appearing in January. The journal periodicity will be twice monthly for *EPR* B and monthly for *EPR* D. Until the end of the present year 1997 authors are asked to submit to the editors or editorial offices following the existing editorial policy. Manuscripts submitted later this year will automatically, if accepted, appear in one of the first issues of *EPR* in 1998. [1]

[1] Please note that from now on **all electronic submissions** to *EPR* B and D should be made via e-mail to the Orsay editorial office (EPRB *or* EPRD@lps.u-psud.fr). All files, TEX, LATEX or Word should be compressed, archived and encoded with public softwares (gzip, tar, uuencode, etc.) before sending. Figures should be included as separate PS or EPS files.

EPR will maintain the idea of divisional editors which has proved to be very successful in editing JP and ZPhys. Hence, authors will be able to submit their manuscripts through different channels, either through the offices of the Editors in Chief or directly to any of the members listed on the Editorial Boards which will be announced very shortly together with the new information, instructions to authors and subscription rates.

Paris and Heidelberg

B. Cagnac for Les Éditions de Physique

S. Grossmann designated Editor for *EPR* B

G. Grynberg designated Editor for *EPR* D

I. Hertel designated Editor for *EPR* D

D. Jérome designated Editor for *EPR* B

H. v. Riedesel for Springer-Verlag
